## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claim 8 is rejected under 35 U.S.C. 102(e) as being anticipated by US 6,021,564 (hereafter Hanson).

Hanson discloses, referring to figure 1, a printed circuit board (1) comprising; an insulative substrate (7) an upper surface pattern (9) and a lower surface pattern (5) provided, respectively on an upper and lower surface of the insulative substrate; and a blind via hole (11) for electrically connecting the upper surface pattern and the lower surface pattern, wherein an upper portion of the blind via hole is opened and a bottom of the blind via hole is covered by the lower surface pattern, the thickness of the upper surface pattern (5 micrometers, see col. 10, lines 25-30) being less than that of the lower surface pattern (19 micrometers, see col. 10, lines 1-10) in order to facilitate etching of the upper surface pattern (see col. 12, lines 30-45) and to prevent the lower surface pattern from being damaged by emission of a laser during formation of the blind via hole (see col. 12, line 65 – col. 13, line 20).

***Response to Arguments***

Applicant's arguments filed 9 June 2003 have been fully considered but they are not persuasive. Applicants have added limitations to claim 8 which Applicants attest are not disclosed in or suggested by Hanson. However, Examiner asserts that the newly added limitations are contained in the broad disclosure of the Hanson invention. Examiner specifically refers to the disclosure by Hanson of the method of forming the blind vias (col. 12, line 15 – col. 13, line 35). Examiner notes that Hanson directly discloses that the upper surface pattern (46 in fig. 5A; analogous to 9 in fig. 1) is to be etched (col. 12, line 2 40-45). Therefore it is clear that Hanson does indeed disclose that the upper surface pattern is sized to facilitate etching. Moreover, Hanson states that the lower surface pattern (50 in fig. 5A, analogous to 5 in fig. 1) is not destroyed during laser drilling of the blind via hole (see col. 13, lines 10-15). Therefore Hanson clearly discloses that the lower surface pattern is protected from damage. Having addressed all of Applicants' arguments, the traversal on the above grounds is deemed unsuccessful.

***Allowable Subject Matter***

Claims 3,5-7, 9, 11-17 are allowed.

***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 2827

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
